

CTD135

CTD135L

Cubelet Ice maker and ice & water dispenser

Standard Features

- Automatic ice dispensing systems and self-service operations are becoming ever more popular in modern Foodservice concepts.
- They allow customers to cool their drinks as per their own taste, making it easy and preventing any potential sanitary hazards: clear and pure ice bits drop directly into the consumer's glass, with no manipulation. Ice dispenser CTD 135 is the industry benchmark in the ice or ice and water dispensers segment.
- This line, in its different versions, is now available in the "Long Range" version that offers an unprecedented 9 kg in-built bin, keeping the same dimension as the original 5 kg version.
- For those locations where the dimension of the counter are limited, we are offering the "Short" version, whose depth has been reduced by close to 6 cm, allowing for installation on most counters. The capacity of the storage bin will not change though, granting the same amount (5 kg) of "Cubelet" super compressed ice.
